The ECOLitAct Training in Athens

The training for the ECOLitAct project took place in Athens, Greece on the 23rd and 24th of January, 2024. During the training there was a briefing on the progress of the project. ACP presented the template for the courses and together we all agreed on using the template of the "recipe". We then selected the topics for the courses and distributed them among the partners.

During the training:

We also held a workshop on how to develop the lessons and agreed on the final format of the lessons. On the second day we discussed about the handbook and its testing, as well as the strategy for utilisation and exploitation and the timelines for the upcoming work.

The training was successful, the partners acknowledged the fruitful work that has been done so far and clarified many issues concerning the next stages of the project. The consortium is ready to proceed energetically with the execution of the project and to have the good communication and respect that has been maintained between the partners so far.

ACP has the pleasure of announcing the 3rd Press Release of the project Eco-Literacy and Green Education for Climate Action.

Now what?

The next step that the project consortium will undertake is the creation of six lessons.

Covered themes include:

- 1) MIL and Tackling misinformation;
- 2) Climate denialism;
- 3) Climate change basics;
- 4) Tackling Waste;
- 5) Consumer behavior - how to reduce your carbon footprint;
- 6) Activism.

The lessons will include the OERs and Learning Scenarios created in the previous phase and will be enriched with any material needed to make them complete.

The translation of the toolkit!

The "ECOLit-Kit", is now ready and the consortium has started its translation into Italian, German, Swedish, Slovenian and Greek. We are very happy and excited that the material after its translation can be used by many people, in many countries and help them to acquire new useful, interesting and crucial for the future knowledge!
