What we have done so far...

THE LEARNING & TRAINING ACTIVITY IN GREECE

The consortium had the pleasure of holding a meeting for internal training in **Athens, Greece**, in **May 2022**.

The partners had the opportunity to meet in person and discuss the platform's design and content for the audience dedicated to ecological and educational purposes.

There was plenty of time to test the specific content, amend it, try it, and check out what works for future users and not.

Once the meeting and the discussions were completed, the production and the finalization of the GREATIVE digital training were our principal outputs.

What is the GREATIVE digital training?

GREATIVE: GREEN STRATEGIES AND CREATIVE SKILLS FOR BUILDING RESILIENT EU PROJECTS

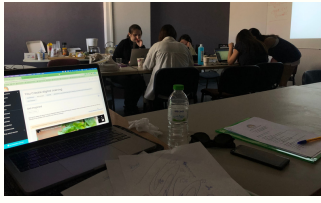

is an online course where you have the opportunity to learn about environmental topics and develop creative skills, with a focus on developing resilient, green EU projects that take into account the on-going environmental and social challenges. The course includes the following modules:

1. *Environmental issues mainly led by production, consumption, and resource disposal*
2. *The concept of the Circular Economy (CE) and its main practices*
3. *A connection between creativity, circularity, and environmentalism*
4. *EU Projects*
5. *The context of the COVID-19 pandemic, its impact on EU projects, and its positive and negative environmental impact*
6. *A workshop with activities to develop creative skills & new ideas to foster circularity within EU projects*

Each module contains:

- videos, texts, and activities for learning
- quizzes and activities to validate the users' knowledge
- a wide range of resources relevant to each topic

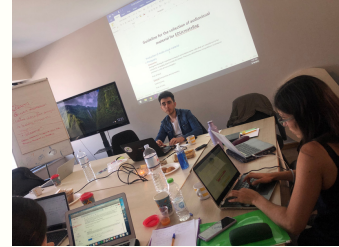

The main focus of the consortium was to create an interactive course through multiple activities.

What the participants say...

"I found the GREATIVE digital training very interesting and inspiring. The training covers many different topics, and the content is presented through innovative and fun activities. After completing the training, I feel motivated to apply the learned methods and approaches in my upcoming projects. I'm convinced, GREATIVE helps me improve the work processes and outcomes of these projects." - Participant from Sweden

"I found it really new and also quite interesting to go through the modules of GREATIVE digital training, and on its way, I learned a lot of new things about nature, the environment, and planning. I think my comments will help to improve the tool for future participants. This module helped me understand my environment better." - Peter Linsen (Participant from Luxembourg)

EDUcreateBAG (Empowering Youth with Creative Tools for Becoming Circularity Leaders)

What is it about?

- an online collection of possible tools related to ECO training (such as exercises, posters, audiovisual material, a collection of training materials and manuals, presentations and case studies)
- it will also include audiovisual material reflecting the skills, experiences, and reflections inspired by the project.
- its tools will be in English.
- EDUcreateBAG will be the result of both theory and practice, divided into three phases:
Creating content, developing and exploiting it, and paving the way for its long-term development impact.

(Currently, the consortium is working on this by collecting suitable and appropriate materials for this production.)
